DENTAL PROPHYLAXIS
PRECEPTORSHIP CHECKLIST**

EFDHA NAME: _____ **VILLAGE:** _____

PRECEPTORSHIP SITE: _____ **DATE:** _____

PRECEPTOR #1 NAME/TITLE: _____

PRECEPTOR #2 NAME/TITLE: _____

PRECEPTOR #3 NAME/TITLE: _____

PRECEPTOR #4 NAME/TITLE: _____

Purpose:

This checklist is to record the number of procedures performed by an EFDHA in order to verify the fulfillment of the minimum requirements (for certification of skill set being performed) set forth in the Community Health Aide Program Certification Board Standards and Procedures. Each procedure must be completed under the direct supervision of an appropriate supervisor. A dental hygienist is able to provide direct supervision of recertification for dental prophylaxis, sealants and dental radiographs. A dentist, DHAT, or DHATP are able to supervise all EFDHA I and II procedures.

Directions: Preceptor will directly observe and determine if the EFDHA has performed the procedure satisfactorily (S) or unsatisfactorily (U). If a “U” is given for the first try, the EFDHA may attempt procedure as many times as needed to perform the skill satisfactorily. The preceptor should initial the line item, once the skill is completed successfully. SATISFACTORY PERFORMANCE should only be initialed and dated when the EFDHA can perform the skill without assistance; however, the manual can be used for reference. Satisfactory performance means that the EFDHA demonstrated the skill well enough to be entrusted to do it in a daily work situation. This tally sheet may be signed off at the training center/ clinic or in the village by an authorized village itinerant. When the checklist is complete, it should be filed by the corporation in the EFDHA’s personnel records.
