**Purpose:**

This checklist is to record the number of procedures performed by a PDHA in order to verify the fulfillment of the minimum requirements (for certification of skill set being performed) set forth in the Community Health Aide Program Certification Board Standards and Procedures.

**Directions:** Only procedures completed satisfactorily should be recorded on this form. The PDHA may attempt procedure as many times as needed to perform the skill. Satisfactory performance means that the PDHA demonstrated the skill well enough to be entrusted to do it in a daily work situation. All procedures are to be performed under direct supervision of a dentist, dental health aide therapist, licensed dental hygienist, or a dental health aide hygienist. When the checklist is complete it should be filed in the PDHA's personnel records.
